

Rivne Tech Website — Rough Draft Content Layout (Designer-Ready)

Build systems and solve operational problems working in sync with your ERP.

1) Global Header (Sticky)

- **Logo (left)**
 - **Primary Nav (center/right)**
 - Solutions
 - Industries
 - How We Work
 - Case Studies
 - About
 - Contact
 - **Primary CTA button:** “Talk through your workflow”
-

Homepage

1) Hero (Above the fold)

- **Headline (H1):** “Supercharge your ERP experience”
- **Subhead (1–2 lines):** Custom ERP-connected systems that replace spreadsheets and disconnected tools with one operational source of truth.
- **Primary CTA:** “Talk through your workflow”
- **Secondary CTA (text link):** “See what we build”

- **Hero visual direction:** Product-style UI montage (cards for Scheduling / Order Visibility / Approvals) or an “ERP → Rivne Tech System → Teams” diagram.
-

2) Problem Recognition: “The Patchwork” (Empathy block)

- **Section headline:** “If you’re stitching tools together, you’ve already outgrown them.”
 - **Bulleted pain statements (customer language):**
 - “We’re exporting to Excel again.”
 - “We’re double-entering the same data.”
 - “Our process lives in people’s heads.”
 - “The ERP can’t handle our real workflow.”
 - “We can’t see what’s happening until it’s too late.”
 - **Bridge line:** Your operation isn’t messy—it’s nuanced. The system should carry that nuance.
-

3) Positioning: “We don’t replace your ERP—we extend it.”

- **Section headline:** “The missing systems on top of your ERP.”
 - **3-column value pillars:**
 1. **Built around your workflow** (rules, exceptions, ownership)
 2. **Connected to ERP data you already trust** (reduce duplicate entry, keep a single truth)
 3. **One place to run the work** (visibility + accountability across teams)
-

4) Solutions Gallery (Core conversion section)

- **Section headline:** “Common ‘missing pieces’ we build”
 - **Card grid (6–8 cards, each links to Solutions detail page):**
 - Production Scheduling & Capacity Planning
 - Order Visibility & Status Management
 - Vendor / Component Tracking
 - Exceptions & On-Hold Workflows
 - Customer Approvals / Portals
 - Dispatch / Install Coordination
 - Quality / Inspection Tracking (optional)
 - Operations Dashboards & Alerts (optional)
 - **Each card includes:**
 - 1-line outcome
 - 2–3 example features (non-technical)
-

5) “One Place” Section (The unifier)

- **Section headline:** “One place your whole team can trust.”
- **Short paragraph:** Replace scattered tools with a unified operational system.
- **Icon bullets (designer-friendly):**
 - One view of every order and status
 - One workflow for handoffs and approvals
 - One system for exceptions and edge cases

- One source of truth across departments
 - **Visual direction:** A single unified “workspace” screen mockup.
-

6) How We Work (Credibility + process clarity)

- **Section headline:** “From workflow to system—without guesswork.”
 - **Step layout (4 steps):**
 1. **Discovery:** Map the real process, constraints, and values
 2. **Blueprint:** Screens + workflow diagrams + data touchpoints
 3. **Build:** ERP integration + role-based experience + automation
 4. **Evolve:** Iterations as your process changes
 - **Optional sidebar:** “Designed for operations: reliability, permissions, auditability.”
-

7) Proof / Trust Section

- **Section headline:** “Built for real operations.”
 - **Pick 1–2 formats (designer choice):**
 - Case study tiles (3)
 - “Before → After” outcomes
 - Testimonials with role + company
 - **Metrics placeholders:** Time saved, fewer handoffs, reduced errors, faster scheduling cycles, fewer spreadsheets.
-

8) CTA Footer Band (Strong close)

- **Headline:** “Show us the workaround—we’ll map the system.”
 - **CTA button:** “Talk through your workflow”
 - **Secondary:** “Contact us”
-

Solutions (Landing Page)

1) Hero

- “ERP extensions designed around your workflow.”
- Quick filter chips: Scheduling, Visibility, Approvals, Vendor Tracking, Dispatch, Exceptions

2) Solution Modules (Repeatable blocks)

For each module:

- What it solves (pain)
- What it unlocks (outcome)
- Typical features (3–6 bullets)
- “Works well when...” (short qualifier)

3) CTA

- “Not seeing your use case? We build to fit your process.”
-

Individual Solution Detail Page Template (for each solution)

1. **Hero:** Outcome headline + who it's for
 2. **The problem in plain language** (customer quotes style)
 3. **What the system does** (capabilities bullets)
 4. **Workflow visual** (simple diagram: Inputs → Steps → Outputs)
 5. **Integration touchpoints** (ERP reads/writes at a high level)
 6. **Roles & permissions** (who uses it)
 7. **CTA:** "Let's map your version of this."
-

Industries Page (Optional but useful)

- **Headline:** "Built for operational businesses running on ERP."
 - Industry cards:
 - Manufacturing
 - Distribution
 - Field Service / Install
 - Job Shops / Custom Fabrication
 - Each card: common challenges + typical systems built
-

Case Studies Page

- Grid of case studies with:
 - Problem statement

- What was built
 - Outcomes
 - Each case study detail page:
 - Context → Constraints → Solution → Results → Screenshots/diagrams
-

About Page

- **Positioning:** “We respect complexity and translate it into systems.”
 - Team / approach
 - Why Rivne Tech (values: operational respect, reliability, long-term partnership)
 - CTA
-

Contact Page

- Short form (name, company, email, ERP, what’s broken today)
 - Scheduling link/button (if you use one)
 - Prompting questions:
 - “What are you tracking in spreadsheets?”
 - “Where does work break down between teams?”
 - “What does ‘one place’ need to include for you?”
-

Global Footer

- Quick links + Solutions list
- Contact info
- Privacy (if needed)
- Short closing line: “Custom systems on top of your ERP—built around your workflow.”

If you want this to be even more implementable for a designer, I can convert this into a **single-page wireframe spec** (section sizes, layout notes, recommended components like grids/cards, and exact placeholder copy for each section).
